Allowed Claims: 24-31

Examiner's Comments

For applicant's information, the amendments to the specification filed July 12, 2005 overcome the previous objection to the specification.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: none of the prior art alone or in combination disclose or teach of the claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically in reference to independent claim 24, none of the prior art either alone or in combination disclose or teach of an optical interference display unit have at least two first electrodes and at least two second electrodes in parallel with and above the first electrodes, including posts between the first and second electrodes to form a first cavity and a second cavity, specifically wherein thickness of the two second electrodes is different to provide different stress and wherein after treating the second electrodes to a thermal process, a length of the first cavity is different than a length of the second cavity.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
